Famos

Famos. The chair that actually wanted to be an armchair.

Second and third generation managing directors: Helmut, Werner and Joachim Link (left to right)

Interstuhl

The idea of a Swabian businessman and developer is embarking on an international journey. It's all about attractive and healthy seating, whether we use it to work, think, discuss, argue or relax.

It's all about a chair that actively supports us at what we are doing.

Interstuhl innovations are conceived, tested and developed in an interesting mix of think-tank and expert laboratory. That is what makes us so unique. Simply stated by Werner Link, the company's owner and Managing Director: "We understand more about sitting". An honest statement that has its origins back in 1961 when the assignment was to create relaxing seating for the workers of a textile factory. The focus ever since has been on expertise and

a genuine interest in our products and the people who use them. We remain true to the spirit of our brand by collaborating with leading institutes on the scientific development of our products. This has resulted in a collection that is unparalleled in its breadth and depth. He who understands more about sitting, has studied it in detail. Interstuhl is such a company and will remain so: a world away from corporate affiliations and concerns about globalization. Over 600 employees craft exclusive German goods and they do so in Germany.

Anyone who understands more about sitting should rise up. Rise above the tired old clichés about quality and materials. Interstuhl is what it is, and what it is is very good.

1F52

Famos. What you see is an honestly innovative office chair. What you don't see is an armchair for relaxing, lounging about and reclining. But that's what you feel, which may be surprising. Famos is an invitation to sit down and feel great. For a long period or short – even for very long office hours. The handsome upholstery is made for relaxed doing and thinking. Nevertheless, Famos has a proportionally slim look.

A chair that feels like an armchair is opening up a new market in the lower and medium price range. Premium seating in a refreshingly economic price class – components that have been combined in Famos for the first time and will provide every owner with long-term enjoyment and the highest quality standards.

The dream of a work armchair is made a reality in Famos. Ergonomically healthy seating with indulgent comfort, relaxed work, feeling comfortable. Everyday life can be relaxed and productive. Despite a slimmer line, the well-balanced upholstery is the special feature of this office swivel chair which also has a very friendly side in terms of economy: good work should not be a matter of price.

Medium-height swivel chair, synchronous mechanism, weight adjustment, 4D T-armrests, black aluminium base

1F52

Medium-height swivel chair, synchronous mechanism, weight adjustment, lumbar support (air-pressure), 4D T-armrests, polished aluminium base

1F52

Medium-height swivel chair, synchronous mechanism, weight adjustment, 4D T-armrests, polished aluminium base

1F62

High swivel executive chair, synchronous mechanism, weight adjustment, 4D T-armrests, polished aluminium base

The upholstery colour of the seat and back area is emphasised interestingly against the black upholstery core and highlights the slim line. The detailed quality can be seen particularly well here.

1F62

Both complementary and well-rounded: the visitor's chair. The four-legged chair and the cantilever chair round off the collection. Conference days can be managed in a laid-back fashion.

Innovative headrests, height and depth-adjustable at just the touch of a handle

The lumbar support with air-pressure technology provides pin-point relief to the spinal column at the touch of a button

T-armrests, 4D adjustable in height, width and depth, swivel-mounted

Upholstery base in the same colour perforated leather, black for the Trevira-CS fabric design

Beautiful form and interesting detail: the plastic back

Well-positioned, self-explanatory control lever

The next position is the best

From the seating specialists

Fact: from an anatomical point of view ergonomics means movement because movement is a critical part of office health. It is a law of nature that effective work processes are one of the most important sources of value-added in the company. Back problems are the greatest causes of absenteeism. A good chair will not heal your back but it is good preven-

tive medicine and eases the pain for those who already suffer. What does an Interstuhl chair do? The patient therapist offers support in each posture. It generates a feeling of well-being in all positions and brings measurable relief.

Naturally, the courage to follow our philosophy of dynamic sitting has meant a break with all the old rules: majestic, immaculate and bolt upright vs. the new

philosophy of doing it with gusto, reclining, lounging, looking out the window, concentrating.

"You can sit however you want. Just sit on the right chair." Each new product development with leading research institutes reconfirms this and it is substantiated by scientific input. The result: Interstuhl chairs accommodate every posture so ergonomically that maximum support is ensured.

- 1** Synchronous mechanism

The synchronous movement of the seat and backrest provides optimum support for the back in every position; the push effect is eliminated.

---

- 2** Sprung column

This ensures that the spine, which is very sensitive to vertical jolts, is not subjected to excessive loads when sitting down, even at the lowest seat height.

---

- 3** Weight adjustment

The individually adjustable counter-pressure of the backrest permits correct sitting for both light and heavy users.

---

- 4** Backrest height adjustment

The support range for the lumbar spine can be ideally adjusted to the height of the user.

---

- 5** Base seat height adjustment

The seat height is a precondition for good sitting. The base seat height adjustment extends the DIN-defined adjustment range and allows ideal sitting for short or tall users.

---

- 6** Seat inclination adjustment

Multiple adjustment of the seat in a forwards direction stops the pelvis from tilting back. This relieves the spine and avoids a poor posture.

---

- 7** Seat depth adjustment

Regulates the distance between the backrest and front edge of the seat, thus providing optimum support for the upper thighs; even for taller users.

---

- 8** Adjustable lumbar support

The horizontally adjustable lumbar support adapts to the individual curve of the lumbar spine; this reduces the muscle strain.

---

- 9** Head and neckrests

The neck and shoulder muscles are relieved by the headrest when you lean back.

## Premium products

Often the word innovation is more of an obstacle than a useful coordinate – all too often inflated claims and abuse of the term for purely promotional reasons obscure the distinction between real innovation and the purely derivative. This is why we are particularly pleased that customers can now not only experience the quality of our products, they can see it too: we are the first manufacturer to be granted the right to label our products with the official “Premium Product” seal, awarded by the LGA testing company and TÜV Rheinland Group certification body. In addition, we have won yet another accolade: the best “Quality Office”. Put simply, every Interstuhl product provides a premium sitting environment and all owners of Interstuhl chairs can rest assured that they have chosen the best possible product. This has a positive impact on the person as a whole and their entire working day. Knowing this, we are more than happy to issue a 5-year guarantee. We share the praise for our innovative seating solutions with the research institutes that are always ready to support our developments and think we’ll keep doing things this way.

### Quality Office

Awarded by the Verband Büro-, Sitz- und Objektmöbel e.V., the German Standards Institute (DIN), the Verwaltungs- und Berufsgenossenschaft, INQA Büro, Initiative neue Qualität der Büroarbeit, and the Federal Institute for Occupational Safety and Health.

Famos comes from the industrial design studio of Hans-Georg Piorek. “Never put up with something that is just about good enough” – this thought is at the basis of Piorek’s design products, creating the connection between the tried-and-tested and the innovative. Famos has succeeded in producing a comfortable office chair, which is reminiscent of sitting in an armchair, while exhibiting an extremely good price-performance ratio.
